
01 Executive Brief

Business Analysis Deliverable

Prepared: 12 September 2026

Status: Final portfolio case study

Classification: Business Confidential — internal use

Document control

Document ID: EBR-001

Version: 3.0

Status: Final portfolio case study

Purpose: Management decision support

Business objective: Understand why revenue performance weakened in Q4, identify the regions, products and customer segments requiring management attention, and agree actions that can improve retention and delivery performance.

1. Executive decision

The connected 2025 sales data shows total revenue declined 1.6% from Q3 to Q4. South is the management priority and declined 2.1% in the same comparison. South SLA achievement fell 9.7 percentage points and support tickets per order increased +32.8%. The evidence supports a focused investigation and service-recovery effort, but it does not establish that service deterioration caused cancellations.

2. What management should know

- South is the priority business focus: revenue moved from ■485,975 to ■475,859 Q3->Q4.
- Service performance weakened in the same period: SLA moved 81.6% -> 71.9%.
- Support pressure increased: tickets/order moved 0.075 -> 0.099.
- Cloud Suite and Analytics Pro declined in South; Enterprise and Partner growth partially offset pressure.
- Only one cancellation is recorded, so customer-level retention conclusions remain unvalidated.

3. Concentration and offsets

Area	Q3	Q4	Movement	Interpretation
South	■485,975	■475,859	-2.1%	Priority from business context
North	Full-dataset regional result	See analysis pack	Largest percentage decline	Not selected as management focus
East	Full-dataset regional result	See analysis pack	Positive movement	Offset
West	Full-dataset regional result	See analysis pack	Near-flat movement	Context

4. Evidence register

ID	Source	Evidence	Period / aggregation
E-001	Sales dataset	1,200 rows covering Jan-Dec 2025; fields include revenue, orders, customers, cancellations, SLA achievement and support tickets.	Full connected dataset
E-002	Overall revenue	Q3 revenue ■1,471,427; Q4 revenue ■1,447,831; movement -1.6%.	All regions, Q3->Q4
E-003	South revenue	Q3 revenue ■485,975; Q4 revenue ■475,859; movement -2.1%.	South, Q3->Q4
E-004	South SLA	SLA achievement 81.6% in Q3 to 71.9% in Q4, a -9.7 percentage-point movement.	South, Q3->Q4
E-005	South support pressure	Support tickets/order 0.075 to 0.099, a +32.8% movement.	South, Q3->Q4
E-006	South product mix	Cloud Suite -11.0%; Analytics Pro -10.5%; CRM Platform -4.3%; Security Plus +27.1%.	South, Q3->Q4
E-007	South segment mix	SMB -21.6%; Mid-Market -18.5%; Enterprise +38.0%.	South, Q3->Q4
E-008	South channel mix	Direct -11.7%; Online -5.7%; Partner +15.9%.	South, Q3->Q4
E-009	Cancellation evidence	Only 1 recorded cancellation exists in the connected dataset. This is insufficient for a customer-level causal analysis.	Full connected dataset
E-010	Business context	Management evidence identifies South as a priority area and raises delivery/SLA and cancellation concerns. Customer-level linkage is required before causal interpretation.	Business documents

5. Decision requested

- Approve a focused Operations review of South delivery and SLA breach detail.
- Approve a Customer Success data request for customer/order-level cancellation reasons and affected orders.
- Ask Sales and Product to review absolute revenue loss in declining South pockets before any broad pricing/product response.
- Assign accountable owners and review dates for the evidence requests.

6. Guardrails

- Do not treat South as the largest raw regional decline unless the regional comparison is explicitly being discussed.
- Do not call SLA deterioration a confirmed root cause of cancellations.
- Do not invent KPI targets, ROI, savings or implementation cost.
- Treat the supplied dataset as a controlled portfolio dataset rather than a production source of truth.
