Business Analysis Deliverable

Prepared: 12 September 2026

Status: Final portfolio case study

Classification: Business Confidential — internal use

Document control

Document ID: BRD-001

Version: 3.0

Status: Final portfolio case study

Owner: Business Analysis

Approval status: Pending business validation

Business objective: Understand why revenue performance weakened in Q4, identify the regions, products and customer segments requiring management attention, and agree actions that can improve retention and delivery performance.

1. Business problem

Q4 revenue weakened by 1.6% versus Q3. South is highlighted by the supplied business context and shows a 2.1% revenue decline, lower SLA achievement and higher support pressure. The organisation needs to determine which commercial and operational factors require action and whether service performance is actually linked to customer cancellations.

2. Objectives

- BO-01 Explain the Q3->Q4 revenue movement using period-aligned evidence.
- BO-02 Determine where the deterioration is concentrated, with South as the management focus from business context.
- BO-03 Assess product, customer-segment and channel contributors.
- BO-04 Validate or reject the proposed service-to-cancellation relationship using customer/order-level evidence.
- BO-05 Convert validated findings into owned actions, measures, dependencies and review cadence.

3. Scope

- 2025 commercial performance; Q3->Q4 comparison; regional, product, segment and channel analysis; South service indicators; cancellation evidence sufficiency; recommendations and BA delivery artefacts.

4. Out of scope

- Pricing or product redesign decisions without supporting analysis; production system replacement; causal claims without linkage; financial ROI calculations without approved cost/benefit assumptions.

5. Stakeholders

Stakeholder	Primary responsibility	Decision interest
Management / Business Owner	Decision and prioritisation	Outcome, risk, target
Operations	Service / delivery owner	SLA, delivery failure, recovery

Stakeholder	Primary responsibility	Decision interest
Customer Success	Retention evidence owner	Cancellation reasons and affected accounts
Sales	Commercial owner	High-value accounts and revenue pockets
Product	Product context owner	Product decline and mix
Analytics / BA	Analysis and traceability	Evidence, requirements, decision support

6. AS-IS business state

- Management has commercial and operational evidence, but the evidence is not yet joined at customer/order level.
- South performance is weaker in Q4 and service signals deteriorated in the same period.
- Business stakeholders have raised cancellation and delivery concerns.
- The current evidence identifies where to investigate but does not prove the individual-level cause of cancellation.

7. TO-BE business state

- A period-aligned performance view identifies the priority area and its absolute impact.
- Commercial, service and retention evidence can be joined at customer/order level where permitted.
- Each finding is labelled observed, hypothesis or evidence gap.
- Approved actions have accountable owners, success measures, dependencies and review dates.

8. Business requirements

ID	Business requirement	Priority	FR link	Evidence
BR-01	Provide reliable commercial KPI baselines	High	FR-01	E-001,E-002
BR-02	Analyse performance by region, product, segment and channel	High	FR-02	E-003,E-006,E-007,E-008
BR-03	Compare aligned periods and quantify movement	High	FR-03	E-002,E-003

ID	Business requirement	Priority	FR link	Evidence
BR-04	Identify and explain the management priority area without false ranking claims	High	FR-04	E-010
BR-05	Assess service indicators alongside commercial movement	High	FR-05	E-004,E-005
BR-06	Assess cancellation evidence only when volume/linkage is sufficient	High	FR-06	E-009,E-010
BR-07	Separate observed evidence from hypotheses and gaps	High	FR-07	E-009,E-010
BR-08	Retain source evidence IDs for material findings	High	FR-08	E-001-E-010
BR-09	Identify evidence needed to validate causal explanations	High	FR-09	E-009,E-010
BR-10	Provide management-ready analysis outputs	Medium	FR-10	E-001-E-010

9. KPI and success measures

KPI	Baseline	Observed movement	Target	Cadence
South revenue	■485,975 -> ■475,859	-2.1%	Target to be approved	Monthly
South SLA	81.6% -> 71.9%	-9.7 pp	Target to be approved	Weekly
Support tickets/order	0.075 -> 0.099	+32.8%	Target to be approved	Weekly

KPI	Baseline	Observed movement	Target	Cadence
Cancellations	1 recorded	Insufficient baseline	Define after richer data	Monthly

10. Business rules and constraints

- Use Q3->Q4 as the primary executive comparison in this case study.
- Use later periods only as monitoring context, not as a substitute for the primary business comparison.
- A relationship between service and cancellation is not causal until customer/order-level linkage is available.
- Business targets and financial benefits require explicit approval or source evidence.

11. Open questions

- Do customers with SLA breaches cancel at a higher rate?
- Which South products contribute the largest absolute revenue loss?
- Do support events precede cancellation events?
- Is the decline operational, product-specific, channel-specific, segment-specific, or combined?

12. Approval

Role	Name	Status
Business Owner		Pending
Operations Owner		Pending
Customer Success Owner		Pending
Analytics / BA		Pending
