
05 Process Specification

Business Analysis Deliverable

Prepared: 12 September 2026

Status: Final portfolio case study

Classification: Business Confidential — internal use

Document control

Document ID: PRC-001

Version: 3.0

Status: Final portfolio case study

Business objective: Understand why revenue performance weakened in Q4, identify the regions, products and customer segments requiring management attention, and agree actions that can improve retention and delivery performance.

1. Process purpose

Define the repeatable BA process for moving from a business concern to an evidence-backed management decision.

2. AS-IS evidence flow

Business concern

Business documents + dataset collected

Performance reviewed

Patterns identified

Driver discussion

Actions proposed

Evidence gaps may remain

3. AS-IS observations

- Commercial and operational evidence exists but is not fully joined at customer/order level.
- The business focus comes from context and cannot be inferred solely from the largest percentage decline.
- Cancellation concerns are reported in business evidence but the connected dataset has only one cancellation.
- Ownership and target setting still require business confirmation.

4. TO-BE evidence-led flow

Business objective

Evidence register

↓

Baseline + aligned-period comparison

↓

Priority area selection

↓

Commercial + operational decomposition

↓

Hypothesis validation

↓

Evidence-gap decision

↓

Recommendation + owner + measure

↓

Management decision

↓

Monitor outcome

5. Process controls

- Use a primary comparison period for executive decisions.
- Label aggregation scope for every material KPI.
- Separate observed evidence from hypotheses.
- Require a validation plan for causal hypotheses.
- Do not assign confirmed owners where the evidence does not name them.

6. Handoffs

Handoff	Inputs	Receiving role	Exit criterion
Context -> Analysis	Objective, source register, business concern	BA / Analytics	Baseline accepted
Analysis -> Investigation	Priority area, contributor results, evidence IDs	BA / Operations	Hypotheses classified
Investigation -> Recommendation	Validated findings, evidence gaps, decision need	BA / Business Owner	Action selected
Recommendation -> Delivery	Owner, KPI, dependency, acceptance criteria	Delivery owner	Approved requirement
Delivery -> Monitoring	Baseline, target, cadence, evidence source	Process owner	Review cycle active

7. Process measures

Measure	Definition	Cadence
South revenue	Q3->Q4 baseline and next comparable period	Monthly
South SLA	Period-aligned SLA achievement	Weekly
Support tickets/order	Operational pressure indicator	Weekly
Evidence closure	Open evidence questions resolved	Weekly
